

Don't take away my XM radios, we can't get a decent local radio station, all the locals play is music for the younger generation and it is full of commercials. I don't mind paying for a quality radio stations like XM. It is that or listen to my wife sing which is better than public radio. Locally we can't get Bloomberg and check the markets or CNN and get the national news either.

I want my traffic and weather reports before I travel across country and get in an area where I don't know the local stations.

Thanks for listening.
